-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 2 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention does **NOT** fall within one of the four statutory categories of invention. These claims cannot be reasonably classified as a composition of matter, a process, a machine or an article of manufacture. Furthermore, the preamble, "A prize pool for.....", seems to suggest that an apparatus is being claimed, however, there are no structural elements recited in the preamble. Furthermore, in the body of the claim there are no structural elements recited. The word "system" does not offer any structure. Also, the recitations "a subordinate prize level", "a jackpot prize level", "a first member lottery", "a second member lottery" "a pre-determined fixed monetary value", and "a pari-mutual basis" all have no structure.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3711

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Markowicz.

The patent to Markowicz discloses a network of individual lottery systems having prize levels. Markowicz discloses two prize levels, a jackpot prize level, national lottery, col. 4, lines 26 to col. 5, line 63, and subordinate prize levels, state lotteries, col. 4, lines 1-25, "State A", "State B", "State C", etc., see Figs. 1 and 3.

5. The recitation "A prize pool for a lotto game played among a plurality of member lotteries, at least two of which are from diverse groups" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally **not** accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

6. The recitations "wherein all member lotteries are eligible for the jackpot prize and wherein a first member lottery awards subordinate prizes having a pre-determined fixed monetary value and a second member lottery awards subordinate prizes on a pari-mutual basis" and "wherein the second member lottery awards a first subordinate prize equal to a fixed percentage of a second subordinate prize", **are recitation of the**

intended use. A recitation of intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. Markowicz' network of individual lottery systems are capable of performing the intended use recitations above.
